APP 17: Qualification of gate judges

Additionally, I would like to point out the following – from what I observed during the World Cup final in Warsaw, the track referees cannot be persons who have no knowledge in Inline Alpine. A lot of technical faults and mistakes could be observed such as plates in wrong positions, and after a mistake or fall of the athlete the right sport form where they have to continue the race was not shown correctly- either side or place. Such aspects do have an impact of the results and the quality of the race itself. The referees must be someone with knowledge and interest in Inline Alpine – parents of the athletes or athletes if for some reason they cannot take part themselves.
