

APP 2: Interruption of the race

16. Interruption of the race

16.2 By the jury

“When rain starts to fall, the race is interrupted once. During the interruption the competitors can adjust their equipment to the new weather conditions.”

To debate—> Is the jury who decides when the next race cannot start?

We had an example in a race in Spain. It started to rain, it was not safe for going with dry wheels and the trainer told the racer not to start. The jury did not interrupt the race yet but it was clear it was not safe to go with dry wheels. There was some trouble about if this racer should be disqualified because she refused to go in unsafe conditions.
