APP 3: Gap time contraction

Another point is when there is no continued wind. Is the racer allowed to say to the starter to wait until the gust of wind stops?

Article 42.7 says the racer has to go 5 second before or after the starter says "GO".

Article 34.16 says that after de "GO" the competitor has to start within 10 seconds.

Note there is a time contradiction

Anyway, is it possible to make an exceptions in these cases? (rain, wind). We should write about it.

ARTICLE 34.26 42.7 gap time contradiction

Article 42.7, 35.14 says the racer has to go 5 second before or after the starter says "GO".

Article 34.16, 35.15 says that after de "GO" the competitor has to start within 10 seconds.

There is a time contradiction

In order to join these articles, I would say the racer can go 5 second before and 10 seconds after the "GO".
